

Did you know 1 in 20 California jobs is in ICT, and they pay twice the average? Do you know that employers are having trouble filling all those high-paying jobs?

Information and communication technologies (ICT) is the fastest growing job sector in San Francisco. Working with computers, information, communication and digital media technologies leads to exciting, high quality jobs, lifestyles and futures!

Do you like:

- ◆ Computers
- ◆ Internet
- ◆ Teamwork
- ◆ Gaming
- ◆ Creating images
- ◆ Videos
- ◆ Broadcasting
- ◆ Sound Production
- ◆ Information Technologies
- ◆ Software
- ◆ Computer Science
- ◆ Digital Media
- ◆ \$\$\$\$

If you said yes to any of these, this is where to start!

No matter what you study, and no matter what work you pursue, ICT knowledge and skills are important success factors. Learn about ICT education pathways to develop these skills to help you succeed, no matter what you do!

To get started, go see Mr. Goncalves in room 239.

Information and Communication Technologies (ICT) is a term used around the world that encompasses all of the rapidly emerging, evolving, and converging computer, software, networking, telecommunications, Internet, programming, information systems and digital media technologies.

To learn more, visit www.baycat.org or call **415-701-8228**.

Internships

Internships are fun and they can lead to jobs and letters of recommendation for college! There are lots of internships available for the summer - and a few during the school year. Go to your College and Career Office to get more information.

Learn on Your Own!

There are also many opportunities to experience and learn ICT through the Internet and through self-study. Have you heard about MOOCs and digital badges?! Search, explore and experiment!
